

National Military Strategy

of the United States of America

SHAPE, RESPOND, PREPARE NOW:

A MILITARY STRATEGY FOR A NEW ERA

19971015 047

1997

CHAIRMAN OF THE JOINT CHIEFS OF STAFF

WASHINGTON, D.C. 20318-9999

DTIC QUALITY INSPECTED 2

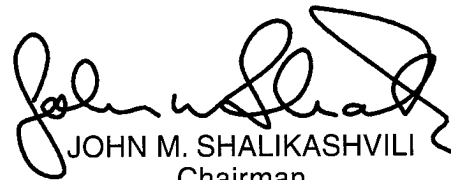

This document conveys my advice and that of the Joint Chiefs of Staff on the strategic direction of the Armed Forces in implementing the guidance in the President's *A National Security Strategy for a New Century* and the Secretary's *Report of the Quadrennial Defense Review*.

We have just completed a year-long assessment of the strategic environment that underscored the continuing importance of robust American military power. While we no longer face the threat of a rival superpower, there are states and other actors who can challenge us and our allies conventionally and by asymmetric means such as terrorism and weapons of mass destruction. The rise of regional powers is leading to a multipolar world that can be either more secure or more dangerous — hence the importance of the President's “imperative of engagement” described herein.

The military has an important role in engagement — helping to shape the international environment in appropriate ways to bring about a more peaceful and stable world. The purpose of our Armed Forces, however, is to deter and defeat threats of organized violence to our country and its interests. While fighting and winning two nearly simultaneous wars remains the foremost task, we must also respond to a wide variety of other potential crises. As we take on these diverse missions, it is important to emphasize the Armed Forces' core competence: *we fight*. That must be the primary consideration in the development and employment of forces.

The Chiefs and I strongly agree that the force levels recommended by the Secretary in the QDR are the minimum necessary to carry out this strategy at prudent military risk. Further, we must begin to transform them now by exploiting technological advances that are changing warfare. To do this with forces that will remain committed to operational readiness, contingency operations and engagement activities requires a stabilized investment program and a fundamental re-engineering of support infrastructure. It also requires that we sustain the high quality men and women serving in the Armed Forces. They are the indispensable and decisive element in any strategy.

Our best judgment is that this strategy, *Shape, Respond, Prepare Now: A Military Strategy for a New Era*, and the forces for which it calls, will protect the Nation and its interests, and promote a peace that benefits America and all like-minded nations.

JOHN M. SHALIKASHVILI
Chairman
of the Joint Chiefs of Staff

NATIONAL MILITARY STRATEGY

SEPTEMBER 1997

Executive Summary

Introduction

The National Military Strategy provides the advice of the Chairman of the Joint Chiefs of Staff (CJCS) in consultation with the Joint Chiefs of Staff and the Combatant Commanders on the strategic direction of the Armed Forces over the next three to five years. In formulating the 1997 National Military Strategy, the CJCS derives guidance from the President's *1997 National Security Strategy* and from the *Quadrennial Defense Review* (QDR) report prepared by the Secretary of Defense.

In both the *1997 National Security Strategy* and the QDR report, the President and the Secretary of Defense introduced an integrated strategic approach embodied by the terms **Shape, Respond** and **Prepare Now**. The 1997 National Military Strategy is based on these concepts. It builds on the premise that the United States will remain globally engaged to **Shape** the international environment and create conditions favorable to US interests and global security. It emphasizes that our Armed Forces must **Respond** to the full spectrum of crises in order to protect our national interests. It further states that as we pursue shaping and responding activities, we must also take steps to **Prepare Now** for an uncertain future.

The Strategic Environment

The United States has entered a period that presents both opportunities and challenges. Our nation is at peace and much of the world embraces the democratic ideals we cherish. The threat of nuclear war has diminished and diplomatic efforts continue to reap benefits in creating a more stable and peaceful world. Nonetheless, there remain a number of uncertainties, including potentially serious threats to America's security. Principal among these are **regional dangers, asymmetric challenges, transnational threats,** and "**wild cards.**" This uncertain environment would be even more threatening without the American engagement and leadership that this strategy supports.

Shape, Respond, and Prepare Now . . .
A Military Strategy for a New Era

The Strategy

National Military Objectives

To defend and protect US national interests, our national military objectives are to **Promote Peace and Stability** and, when necessary, to **Defeat Adversaries**. US Armed Forces advance national security by applying military power as directed to help **Shape** the international environment and **Respond** to the full spectrum of crises, while we also **Prepare Now** for an uncertain future.

Elements of Strategy

Shaping the International Environment. US Armed Forces help shape the international environment through deterrence, peacetime engagement activities, and active participation and leadership in alliances. Critical to deterrence are our conventional warfighting capabilities and our nuclear forces. Deterrence rests on a potential adversary's perception of our capabilities and commitment,

which are demonstrated by our ability to bring decisive military power to bear and by communication of US intentions. Engagement activities, including information sharing and contacts between our military and the armed forces of other nations, promote trust and confidence and encourage measures that increase our security and that of our allies, partners, and friends. By increasing understanding and reducing uncertainty, engagement builds constructive security relationships, helps to promote the development of democratic institutions, and helps keep some countries from becoming adversaries tomorrow.

Responding to the Full Spectrum of Crises. The US military will be called upon to respond to crises across the full range of military operations, from humanitarian assistance to fighting and winning major theater wars (MTW), and conducting concurrent smaller-scale contingencies. Our demonstrated ability to rapidly respond and to decisively resolve crises provides the most effective deterrent and sets the stage for future operations if force must be used. Should deterrence fail, it is imperative that the United States be able to defeat aggression of any kind. Especially important is the ability to deter or defeat nearly simultaneous large-

To defend and protect US national interests, our national military objectives are to Promote Peace and Stability and, when necessary, to Defeat Adversaries.

scale, cross-border aggression in two distant theaters in overlapping time frames, preferably in concert with allies. The ability to rapidly defeat initial enemy advances short of their objectives in two theaters in close succession reassures our allies and ensures the protection of our worldwide interests. We must also be prepared to conduct several smaller-scale contingency operations at the same time, as situations may dictate the employment of US military capabilities when rapid action is required to stabilize a situation.

Preparing Now for an Uncertain Future. As we move into the next century, it is imperative that the United States maintain the military superiority essential to our global leadership. Our strategy calls for transformation of our doctrine and organizations and a stabilized investment program in robust modernization that exploits the Revolutions in Military Affairs (RMA) and Business Affairs (RBA).

Strategic Concepts

The National Military Strategy describes four strategic concepts that govern the use of our forces to meet the demands of the strategic environment. **Strategic Agility** is the timely concentration, employment and sustainment of US military power anywhere,

at our own initiative, and at a speed and tempo that our adversaries cannot match. It is an important hedge against the uncertainty we face. It allows us to conduct multiple mis-

sions, across the full range of military operations, in geographically separated regions of the world.

Overseas Presence is the visible posture of US forces and infrastructure strategically positioned forward, in and near key regions. Forces present overseas promote stability, help prevent conflict, and ensure the protection of US interests. Our overseas presence demonstrates our determination to defend US, allied, and friendly interests while ensuring our ability to rapidly concentrate combat power in the event of crisis. **Power Projection** is the ability to rapidly and effectively deploy and sustain US military power in and from multiple, dispersed locations until conflict resolution. Power projection provides the flexibility to respond swiftly to crises, with force packages that can be adapted rapidly to the environment in which they must operate, and if necessary, fight their way into a denied theater. **Decisive Force** is the commitment of sufficient military power to overwhelm an adversary, establish new military conditions, and achieve a political resolution favorable to US national interests. Together, these four strategic concepts emphasize that America's military must be able to

As we move into the next century, it is imperative that the United States maintain the military superiority essential to our global leadership.

employ the right mix of forces and capabilities to provide the decisive advantage in any operation.

The Joint Force

Our Armed Forces are the preeminent military force in the world, persuasive in peace and decisive in war. To successfully implement our strategy of shaping, responding, and preparing, the forces and capabilities recommended in the QDR report are essential. Equally critical to the success of our strategy are the men and women who comprise our military forces. We must continue to recruit, train, and maintain a high quality force to ensure our nation's security. Our forces must maintain the high state of readiness that is essential to global leadership; thus the means by which we achieve, maintain, and evaluate our readiness demand continued emphasis. Our military must be ready to fight as a coherent joint force -- fully interoperable and seamlessly integrated. Capitalizing on technology will also be central to maintaining military supe-

riority. Our modernization effort will focus on those technologies that improve the combat effectiveness of our Armed Forces while enhancing the interoperability and integration of the Total Force. Modernization is not an end in itself, but a means to improve the capabilities of our warfighters across the full range of military operations -- from peacetime engagement activities to war.

Our Armed Forces are the preeminent military force in the world, persuasive in peace and decisive in war.

Conclusion

The National Military Strategy of **Shaping, Responding, and Preparing Now** addresses the challenges and opportunities that confront us now

as well as those that await us as we approach the next century. Working with our allies, partners, and friends, we will promote peace in an increasingly complex and potentially more dangerous world. This strategy will ensure that the US military will remain capable of performing whatever tasks we are called upon to perform around the world in the years ahead.

Introduction

The National Military Strategy (NMS) provides advice from the Chairman of the Joint Chiefs of Staff (CJCS), in consultation with the Joint Chiefs of Staff (JCS) and the Combatant Commanders, to the National Command Authorities (NCA) on the strategic direction of the Armed Forces. Based on *A National Security Strategy for a New Century*, approved by the President in May 1997, and the report of the Secretary of Defense to Congress of the 1997 QDR, the NMS describes the strategic environment, develops national military objectives and the strategy to accomplish those objectives, and describes the military capabilities required to execute the strategy. As an unclassified document, it makes this advice accessible to the widest range of government officials, interested citizens, and foreign leaders.

Purpose of the Armed Forces

The President's *1997 National Security Strategy* advances the Nation's fundamental and enduring security needs: protection of the lives and safety of

Americans; maintenance of the sovereignty of the United States, with its values, institutions and territory intact; and provision for the prosperity of the Nation and its people. It further establishes as a core objective "to enhance our security with effective diplomacy and with military forces that are ready to fight and win."

The Armed Forces are the Nation's military instrument for ensuring our security. Accordingly, the primary

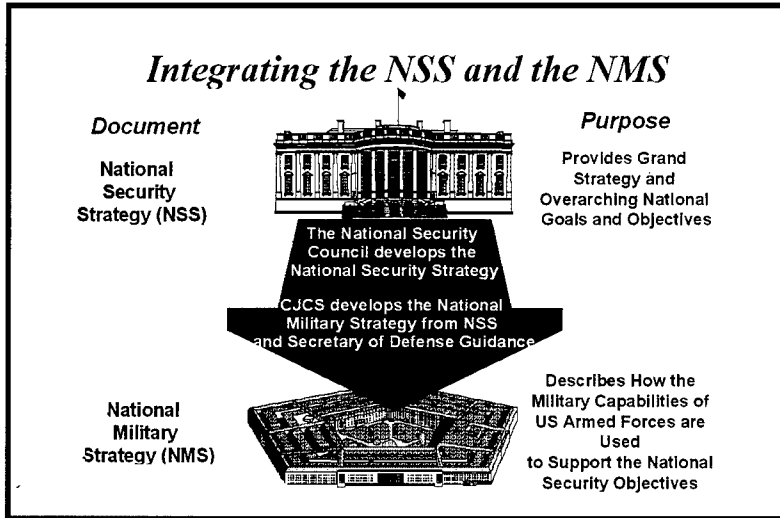

purpose of US Armed Forces is to deter threats of organized violence against the United States and its interests, and to defeat such threats should deterrence fail. The military is a complementary element of national power that stands with the other instruments wielded by our government. The Armed Forces' core competence is the ability to apply decisive military power to deter or defeat aggression and achieve our national security objectives.

Fighting and Winning Our Nation's Wars

Our Armed Forces' foremost task is to fight and win our Nation's wars. Consequently, America's Armed Forces are organized, trained, equipped, maintained, and deployed primarily to ensure that our Nation is able to defeat aggression against our country and to protect our national interests.

Protecting US National Interests

US national interests fall into three categories. First in priority are our *vital interests* -- those of broad, overriding importance to the survival, security, and

may exceed the capacity of other agencies and require the use of military forces, depending upon applicable law, the direction of the NCA, and the national interest involved. In addition, military resources will continue to support civil authorities in executing missions such as civil works, disaster relief, and domestic crises.

The Imperative of Engagement

The President's *National Security Strategy for a New Century* stresses "the imperative of engagement" and enhancing our security

through integrated approaches that allow the Nation to **Shape** the international environment; **Respond** to the full spectrum of crises; and **Prepare Now** for an uncertain future. Our strategic approach uses all appropriate instruments of national power to influence the actions of other states and nonstate actors, exert global leadership, and remain the preferred security partner for the community of states that share our interests. The Armed Forces play a key role in this effort. The United States' unparalleled military capabilities form the foundation of mutually beneficial alliances and security partnerships, undergird stability in key regions, and buttress the current worldwide climate of confidence that encourages peace, economic growth, and democratization. Our global engagement makes the world safer for our Nation, our citizens, our interests, and our values.

Our global engagement makes the world safer for our Nation, our citizens, our interests, and our values.

territorial integrity of the United States. At the direction of the NCA, the Armed Forces are prepared to use decisive and overwhelming force, unilaterally if necessary, to defend America's vital interests. Second are *important interests* – those that do not affect our national survival but do affect our national well-being and the character of the world in which we live. The use of our Armed Forces may be appropriate to protect those interests. Third, armed forces can assist with the pursuit of *humanitarian interests* when conditions exist that compel our nation to act because our values demand US involvement. In all cases, the commitment of US forces must be based on the importance of the US interests involved, the potential risks to American troops, and the appropriateness of the military mission.

Throughout our history, America's Armed Forces have responded to a variety of national needs other than waging wars. The security environment we face includes threats to our country and to our interests that are not "war" in the classical sense, and yet may call for military forces. Terrorism, weapons of mass destruction (WMD), illegal drug-trafficking, and other threats at home or abroad

Peacetime military engagement encompasses all military activities involving other nations intended to shape the security environment in peacetime.

A Posture of Global Engagement

Because America is engaged worldwide, even in peacetime, significant portions of our Armed Forces are present overseas or readily available to deploy overseas, where many of our interests are found. This posture of global engagement and the activities of our forces deployed around the world help shape the international environment by promoting stability and the peaceful resolution of problems, deterring aggression, and helping to prevent conflict. They also preserve our access to important

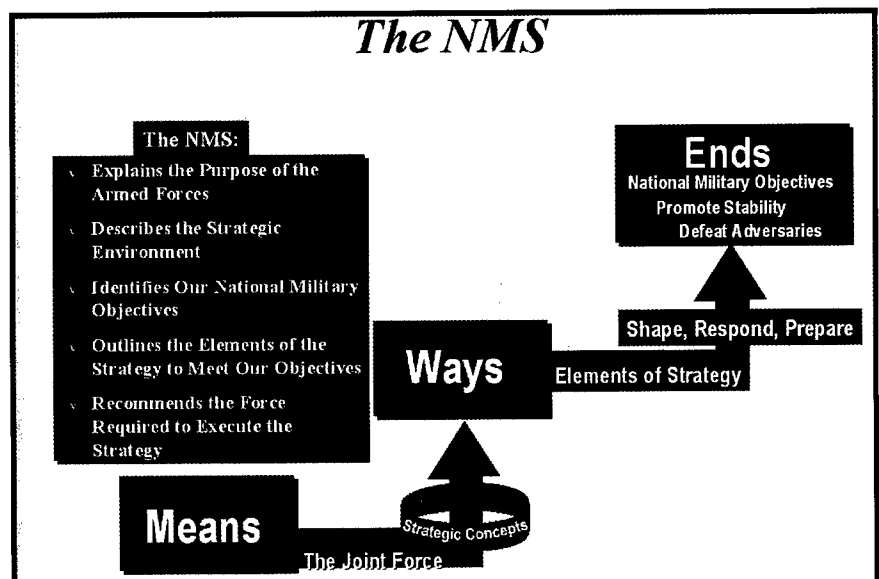

infrastructure, position our military to respond rapidly to emerging crises, and serve as the basis for concerted action with others.

Peacetime Military Engagement

Peacetime military engagement encompasses all military activities involving other nations intended to shape the security environment in peacetime. Engagement is a strategic function of all our Armed Forces,

but it is a particularly important task of our forces overseas -- those forward stationed and those rotationally or temporarily deployed. Engagement serves to demonstrate our commitment; improve interoperability; reassure allies, friends and coalition partners; promote transparency; convey democratic ideals; deter aggression; and help relieve sources of instability before they can become military crises.

The text that follows describes our strategic ends, ways, and means. After summarizing the near-term strategic environment from a military perspective, it then describes the "ends:" the national military objectives that support the President's national security strategy and the Secretary's QDR defense strategy. Next, it outlines the "ways" by which the military pursues these objectives according to the integrated approaches of Shaping, Responding, and Preparing Now, and the supporting military strategic concepts. Finally, the NMS describes the necessary "means:" the joint forces required to carry out the strategy.

The Strategic Environment — Opportunities and Challenges

Although the United States currently enjoys relative peace and security, the strategic environment remains complex and potentially dangerous. The threat of global war has receded. Former adversaries now cooperate with us across a range of security issues, and many countries view the United States as the security partner of choice. Our core values of representative democracy and market economics are embraced in many parts of the world, creating new possibilities for enduring peace, prosperity, and cooperation among nations. We are not confronted by a “peer competitor” -- a hostile power of similar strength and capability -- nor are we likely to be in the near future. Given the United States’ military potential and ability to deploy to any region of conflict, it is also unlikely that any regional power or coalition could amass sufficient conventional strength to defeat our Armed Forces. We therefore have an unprecedented opportunity to shape the future security environment. We are successfully adapting our military alliances to new realities and building security relationships with new coalition partners. There are, nonetheless, significant challenges. Ethnic, economic, social, and environmental strains continue to cause instability and the poten-

tial for violence. Regional conflict remains possible, proliferation of weapons of mass destruction is a major concern, and we face a number of nontraditional, transnational, and unpredictable threats to our security.

Regional Dangers

The potential for conflict among states and groups of states remains our most serious security challenge. Despite the best efforts of engagement, it is likely that more than one aspiring regional power will have both the desire and means to challenge the United States militarily. Iran, Iraq, and North Korea currently pose this challenge, with no guarantee that these threats will diminish significantly soon.

Numerous other regional powers have increasing access to wealth, technology, and information, potentially giving them greater military capability and more influence. Some may attempt to become dominant in a region,

intimidating US allies and friends, pursuing interests hostile to our own, and developing asymmetric capabilities, including nuclear, biological, and chemical weapons of mass destruction (WMD) and the means to deliver them. With instant global commu-

nications, geographically-separated aggressors could easily coordinate hostile actions. Failed and failing states, and conflict that is not directed against the United States, can also threaten our interests and the safety of our citizens.

Asymmetric Challenges

Some state or nonstate actors may resort to asymmetric means to counter the US military. Such means include unconventional or inexpensive approaches that circumvent our strengths, exploit

our vulnerabilities, or confront us in ways we cannot match in kind. Of special concern are terrorism, the use or threatened use of WMD, and information warfare. These three risks in particular have the potential to threaten the US homeland and population directly and to deny us access to critical overseas infrastructure. Other challenges include exploiting commercial and foreign space capabilities, threatening our space-based systems, interrupting the flow of critical information, denying our access to strategic resources, and environmental sabotage. Hostile actors may use

such means by themselves or in conjunction with conventional military force. Such asymmetric challenges are legitimate military concerns. We must increase our capabilities to counter these threats and adapt our military doctrine, training, and equipment to ensure a rapid and effective joint and interagency response.

Transnational Dangers

The security environment is further complicated by challenges that transcend national borders and threaten our national interests. Human emergencies other than armed conflict; extremism, ethnic disputes, and religious rivalries; international organized crime, including illegal trade in weapons, strategic materials or illicit drugs, as well as piracy; massive refugee flows; and threats to the environment each have the potential to put US interests at risk. These challenges can obstruct economic growth and democratic development and lead to conflict. Complicating the situation is the continued blurring of the distinction between terrorist groups, factions in ethnic conflicts, insurgent movements, international criminals, and drug cartels. Failure to deal with such security concerns early in their development may require a more substantial response to a more dangerous problem later.

Some state or nonstate actors may resort to asymmetric means . . . unconventional or inexpensive approaches that circumvent our strengths, exploit our vulnerabilities, or confront us in ways we cannot match in kind.

“Wild Cards”

We can never know with certainty where or when the next conflict will occur, who our next adversary will be, how an enemy will fight, who will join us in a coalition, or precisely what demands will be placed on US forces. A number of “wild card” threats could emerge to put US interests at risk. Such threats range from the emergence of new technologies that neutralize some of our military capabilities, to the loss of key allies or alliances and the unexpected overthrow of friendly regimes by hostile parties. While an individual “wild card” may appear unlikely, the number of possible “wild cards” make it more likely that at least one of them will occur with disproportionately high consequences. While asymmetric challenges and transnational dangers are serious in themselves, a particularly grave “wild card” is the combination of several such threats. Acting in collusion with other hostile entities, for example, an adversary might attempt to combine multiple asymmetric means with the seizure of a strategic objective before we

could respond. Such an attack — timed to avoid US forces while they are committed elsewhere, and supported by diplomatic and propaganda efforts — could be directed against an important national interest. This could critically undermine US will, credibility, access, and influence in the world.

The strategic environment facing us is complex, dynamic, and uncertain. If the United States were to withdraw from international commitments, forsake its leadership responsibilities, or relinquish military superiority, the world would become more dangerous and the threats to US interests would increase. It is in this environment that US Armed Forces must carry out their tasks to protect America and its interests.

The strategic environment facing us is complex, dynamic, and uncertain . . . It is in this environment that the United States Armed Forces must carry out their tasks to protect America and its interests.

The Strategy — Shape, Respond, Prepare Now

Our National Military Strategy depends first and foremost upon the United States remaining secure from external threats. A secure homeland is fundamental to US global leadership; however, it is not the only prerequisite. To protect and promote US national interests, our national military objectives are to **Promote Peace and Stability** and, when necessary, to **Defeat Adversaries** that threaten the United States, our interests, or our allies. US Armed Forces advance national security by applying military power to **Shape** the international environment and **Respond** to the full spectrum of crises, while we **Prepare Now** for an uncertain future.

National Military Objectives

Promote Peace and Stability.

Promoting peace and stability means creating and sustaining security conditions globally, and in key regions, that allow the peaceful pursuit of our interests and the just resolution of international problems through political means. This does not imply a resistance to change; rather, it underscores a desire for peaceful change. Pursuit of this objective supports the President's 1997 *National Security Strategy* by ensuring that no critical region is dominated by a power hostile to the United States and that regions of greatest importance to the US are stable and at peace. Such stability

reduces the likelihood of widespread conflict and allows the pursuit of our interests by other instruments of national power. Where a potential regional hegemon threatens our interests and those of our allies through the buildup or use of armed forces, US military power may be concentrated to assure allies and friends, redress the imbalance,

and deter or defeat aggression. Where the risk to peaceful political intercourse stems from other sources, US forces may conduct operations or otherwise contribute to efforts that seek to prevent conflict and reduce threats. Our role as a global leader is underscored by US forces performing tasks that encourage other nations to resolve problems through negotiation and compromise rather than by aggression and intimidation.

Defeat Adversaries. In the event of armed conflict, US Armed Forces will render an adversary incapable

of armed resistance through destruction of his capacity to threaten our interests or by breaking his will to do so. This sets the military conditions for winning the peace. In conducting combat operations, the United States will use all means available, commensurate with the national interest at stake, the risks involved, and international law. We will endeavor to commit decisive force to ensure that we achieve the objectives established by the NCA and conclude hostilities in the shortest time possible and on terms favorable to the United States.

Elements of the Strategy: Shape, Respond, Prepare Now

US Armed Forces help shape the international environment primarily through their inherent deterrent qualities and through peacetime military engagement.

US Armed Forces pursue these national military objectives in support of the President's integrated approaches of shaping, responding, and preparing now, which synchronize all elements of national power to achieve our security objectives. Our use of military force should be guided by several considerations. First, military force should be used judiciously and decisively. Military missions must be clearly stated, with achievable military ob-

- Deter aggression and coercion

Respond... to full spectrum of crises

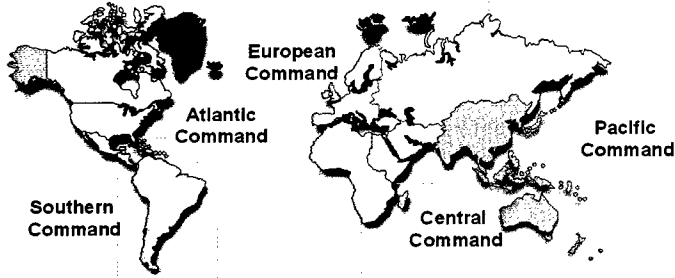

- Deter aggression and coercion in crises
- Conduct smaller-scale contingency operations
- Fight and win major theater wars

Elements of the Strategy

as a joint team, harmonizing the unique and complementary strengths and capabilities of each of our Services. Third, while retaining unilateral capability, whenever possible we must seek to operate alongside alliance or coalition forces, integrating their capabilities and capitalizing on their strengths. Finally, we must ensure that the conditions necessary for terminating military involvement and withdrawing military forces are clearly established.

Shaping the International Environment. US Armed Forces help shape the international environment primarily through their inherent deterrent qualities and through peacetime military engagement. The shaping element of our strategy helps foster the institutions and international relationships that constitute a peaceful strategic environment by promoting stability; preventing and reducing conflict and threats; and deterring aggression and coercion.

Promoting Stability. Through peacetime engagement activities, US Armed Forces promote regional stability, increase the security of allies and friends, build coalitions, and ensure a more secure global environment. The commanders-in-chief of our unified commands, based on guidance

On any given day, the Total Force...

is deployed in support of 10 Joint/Combined Operations and participates in 11 exercises in over 70 countries.

from the NCA and CJCS, develop plans and employ forces and personnel in peacetime to protect and promote US interests and regional security objectives.

Our international exercise program is one such activity. Exercises enhance interoperability and readiness and demonstrate our ability to form and lead effective coalitions. They demonstrate our capabilities and resolve to friends and potential adversaries alike. They provide realistic conditions for working with the technologies, systems, and operational procedures that will be crucial in times of crisis. International exercises also provide geographic familiarity and foster an understanding of cultures, values, and habits of other societies. Exercises encourage burden sharing on the part of friends and allies, and facilitate regional integration.

Through other engagement activities, such as information sharing and a wide range of contacts between our military and the defense establishments of other nations, we promote trust and confidence and increase the security of our allies, partners, and friends. Partnership for Peace,

defense cooperation activities, foreign military sales, the International Military Education and Training (IMET) program, and other programs establish long-term professional relationships between our Armed Forces and the future military leadership of other countries. Military-to-military contacts with countries that are neither staunch friends nor confirmed foes build constructive security relationships, help to promote the appropriate role of armed forces in a democratic society, and enhance stability.

Preventing or Reducing Conflicts and Threats.

Conflict prevention means the reduction, mitigation, or neutralization of the causes of conflict. Though the military by itself can rarely address the root causes of conflict -- as it often stems from political, economic, social, and legal conditions that are beyond the core competence of the military to resolve -- military forces can provide a degree of fundamental security and use their unique operational and logistical capabilities to help civil initiatives succeed. Such military operations can have

Through . . . engagement activities such as . . . contacts between our military and the defense establishments of other nations, we promote trust and confidence and increase the security of our allies, partners, and friends.

Deterrence rests . . . on our demonstrated ability and willingness to defeat potential adversaries . . . Our deterrence capability gives allies and friends the confidence necessary for normal political discourse and peaceful resolution of differences.

important strategic value when they promote the overall stability the US seeks, thus reducing the need for greater military effort later.

The US effort to prevent conflict and reduce threats includes arms control measures as an essential part. Verifiable arms control agreements, as well as confidence building and transparency measures, help reduce tensions and dangers. Military resources are an important component of this effort, particularly in the conduct of reciprocal inspection, verification, and, in

some cases, enforcement activities. Bringing worldwide arsenals into conformity with international nonproliferation standards, helps to reduce uncertainty about potential threats, and allows countries to direct resources to safer, more productive relations. The United States remains committed to our obligations under bilateral and international arms control agreements. Expanding arms control efforts to address the use or possession of WMD, the development of WMD technology, and the control and transfer of fissionable

material are also extremely important to enhancing US security.

Peacetime Deterrence. Deterrence means preventing potential adversaries from taking aggressive actions that threaten our interests, allies, partners, or friends. It is the military's most important contribution to the shaping element of the President's strategy. Deterrence rests in large part on our demonstrated ability and willingness to defeat potential adversaries and deny them their strategic objectives. Our deterrence capability gives allies and friends the confidence necessary for normal political discourse and peaceful resolution of differences. The critical elements of deterrence are our conventional warfighting capabilities: forces and equipment strategically positioned, our capability to rapidly project and concentrate military power worldwide; our ability to form and lead effective military coalitions; and our capacity to protect our homeland, forces, and critical infrastructure from the full range of potential threats. Our strategic nuclear forces complement our conventional capabilities by deterring any hostile foreign leadership with access to nuclear weapons from acting against our vital interests. Our nuclear forces may also serve to convince such

leaders that attempting to seek a nuclear advantage would be futile.

Responding to the Full Spectrum of Crises.

Given the strategic environment, the US military undoubtedly will be called upon to respond to crises across the full range of military operations, from humanitarian assistance to fighting and winning MTWs and conducting concurrent smaller-scale contingencies. US forces must be able to respond to crises from a posture of global engagement. In the event of a major theater war the United States will need to be extremely selective in undertaking substantial engagement activities and smaller-scale contingency operations. More than

likely, we would have to disengage from activities and operations not deemed vital in order to better posture our forces to deter or defeat aggression in a second major theater war. A credible US force-in-being, despite multiple demands, is a key stabilizing influence in the world. Responding to multiple concurrent

contingencies requires careful consideration to ensure our forces are not dissipated and therefore either unable, or perceived as unable, to respond to more critical threats.

Deterring Aggression or Coercion in Crisis. The first response in any crisis normally consists of steps to deter an adversary so the situation does

not require a greater US response. This generally involves signaling our commitment by enhancing our warfighting capability in a theater or by making declaratory statements to communicate US intentions and the potential cost of aggression to an adversary. We may also choose to emphasize our resolve by responding in a limited manner, for example, by enforcing sanctions or conducting limited strikes. The deterrent posture and activities

of our armed forces ensure we remain prepared for conflict should deterrence fail.

Fighting and Winning Major Theater Wars. As a global power with worldwide interests, it is imperative that the United States be able to deter and defeat nearly simultaneous, large-scale, cross-border aggression in two distant theaters in overlapping time frames, preferably in concert with regional allies. For the time being, we face this challenge in the Arabian Gulf region and in Northeast Asia. However, even should these challenges diminish, this capability is critical to maintaining our global leadership role. Lack of such a capability would signal to key allies our inability to help defend mutual interests, thus weakening our alliances and coalitions. Because

A credible US force-in-being, despite multiple demands, is a key stabilizing influence in the world.

such weakness would not escape the attention of potential adversaries, it might make two simultaneous crises more likely. US commitment

to one crisis would present the opportunity, otherwise unrealized, for another aggressor to act. Even more dangerous, it could inhibit the United States from responding to a crisis promptly enough, or even at all, for fear of committing our only forces and thereby making ourselves vulnerable in other regions of the world. The capability to fight two major theater wars initiated in rapid succession is of critical importance as it helps deter opportunism, promote stability, and provide the depth and flexibility to deal with unanticipated challenges.

In this regard, a particularly challenging requirement associated with fighting and winning major theater wars is being able to rapidly defeat initial enemy advances short of their objectives in two theaters in close succession, one followed almost immediately by another. Maintaining this capability is absolutely critical to our ability to seize the initiative in both theaters and to minimize the amount of territory we and our allies must regain from aggressors. Failure to halt an enemy invasion rapidly would make the subsequent campaign to evict enemy forces from captured

territory much more difficult, lengthy, and costly. Such failure would also weaken coalition support, undermine US credibility, and increase the risk of conflict elsewhere.

Conducting Multiple, Concurrent Smaller-Scale Contingency Operations.

Future challenges to our interests will likely require use of our forces in a wide range of concurrent operations short of major theater war. Swift action by military forces may sometimes be the best way to prevent, contain, or resolve conflict, thereby precluding greater effort and increased risk later. Using some of our unsurpassed capabilities in the pursuit of common interests and values demonstrates leadership and encourages confidence and greater contributions by others, reducing the demand on ourselves in the long run. US military forces provide a full array of capabilities that can be tailored to give the NCA many options in pursuing our interests. Our capacity to perform shows of force, limited strikes, opposed interventions, no-fly zone and sanctions enforcement operations, interposition or observation operations, and other missions allows us to deter would-be aggressors and control the danger posed by rogue states. US forces can perform peace operations and humanitarian assis-

Swift action by military forces may sometimes be the best way to prevent, contain, or resolve conflict, thereby precluding greater effort and increased risk later.

. . . we must transform US combat capabilities and support structures, but while we do so our forces must remain engaged worldwide. . .

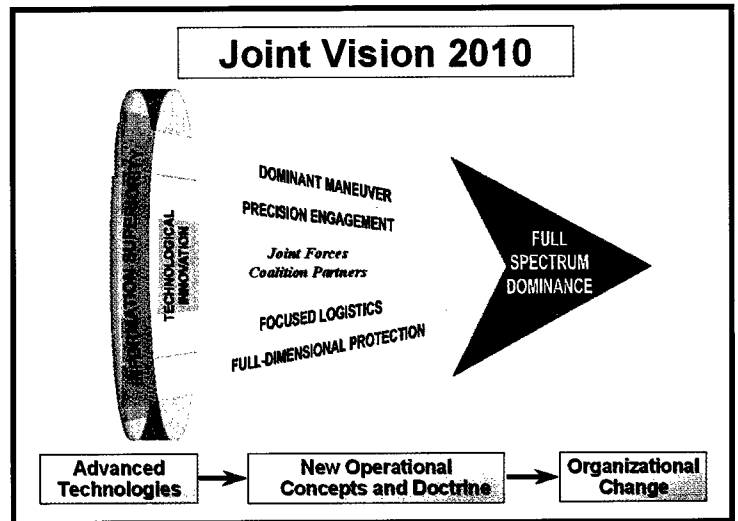

tance operations, and can evacuate noncombatants from dangerous situations, whether opposed or unopposed. US forces will act unilaterally and in concert with security partners, using all means authorized by the President and the Congress, to counter international terrorism at home and abroad. Unique military capabilities can also support domestic authorities in

combating direct and indirect threats to the US homeland, such as the illegal drug trade, especially when the potential for violence exceeds the capability of domestic agencies.

Preparing Now for an Uncertain Future. As we move into the next century, it is imperative that the United States maintain the military superiority essential to our global leadership. To be able to respond effectively in the future, we must transform US combat capabilities and support structures, but while we do so, our forces must remain engaged worldwide and ready to fight and win two nearly simultaneous major theater wars. Success demands a stabilized investment program in robust modernization that exploits the RMA. It also requires fundamental reengineering of our infrastructure and streamlining of our support structures through the RBA to realize the cost

efficiencies necessary to recapitalize the force. Though difficult to accomplish, such tasks are essential to reaching new levels of joint warfighting effectiveness.

Joint Vision 2010 is the conceptual template for joint operations and warfighting in the future. It provides the azimuth for the Services' visions, thus ensuring the future interoperability of the joint force. Because we will often act in concert with like-minded nations, as we implement *JV 2010*, we must also retain interoperability with our allies and potential coalition partners. This vision of future capabilities guides our warfighting requirements and procurement, and focuses technological development. *JV 2010's* key enablers of information

superiority and technological innovation will transform the current concepts of maneuver, strike, protection, and logistics into the new operational concepts of dominant maneuver, precision engagement, focused logistics, and full-dimensional protection. Turning these concepts into reality will help us to conduct decisive operations in any environment, a characteristic *JV 2010* calls "full spectrum dominance." *JV 2010* rests on the foundations of information superiority and technological innovation.

Information Superiority. Information superiority is the capability to collect, process, and disseminate an uninterrupted flow of precise and reliable information, while exploiting or denying an adversary's ability to do the same. While it is dependent upon superior technology, systems integration, organization and doctrine, it is not an inherent quality but, like air superiority, must be achieved in the battlespace through offensive and defensive information operations. Information superiority

yields battlespace awareness, an interactive, shared and highly accurate picture of friendly and enemy operations as they occur. Information superiority allows our commanders to employ widely dispersed joint forces in decisive operations, engage and reengage with the appropriate force, protect the force throughout the battlespace, and conduct tailored logistical support.

Technological

Innovation. As we reshape our forces to meet the challenges of a changing

world through development of new doctrine, organizations, materiel, and training. Development and acquisition of new systems and equipment will improve our ability to conduct decisive operations and achieve full spectrum dominance. However, they are not a panacea. We must recognize that each includes inherent vulnerabilities; each must be applicable across the range of operations; and each must enhance the human capability of our forces.

Balanced Evolution. The fundamental challenge for our Armed Forces is to shape and respond in the current and near-term security environment, while we concurrently prepare for the future. Because our forces are engaged worldwide every day, their transformation to achieve the new capabilities described in *JV 2010* is necessarily evolutionary. Through a rigorous process of experimentation, assessment, refinement, and doctrinal development, we can meet our responsibility to maintain ready forces today while taking steps to transform those forces to be superior tomorrow. This transformation of our forces is not a choice between people or technology, but about how to integrate the strengths of

This transformation of our forces is not a choice between people and technology, but about how to integrate the strengths of both to give the nation the best possible military capability.

world, we will leverage emerging technologies to enhance the capabilities of our servicemen and

both to give the Nation the best possible military capability. It involves much more than the acquisition of new military systems. It means harnessing new technologies to give US forces greater military capabilities through advanced concepts, doctrine, and organizations so that they can dominate any future battlespace.

Strategic Concepts

Strategic concepts are key ideas that govern our use of military force and forces as we execute the strategy of **Shape, Respond, Prepare Now**. These ideas are also important considerations that guide how our forces are trained, equipped, and organized.

Strategic Agility. Strategic agility is the timely concentration, employment, and sustainment of US military power anywhere at our own initiative, at a speed and tempo that our adversaries cannot match. Our forces must be able to seize and maintain the momentum of operations rapidly to meet multiple demands in an uncertain and complex strategic environment. Strategic agility requires our Armed Forces to be versatile, that is, to conduct

multiple missions simultaneously, across the full range of military operations, in geographically separated regions of the world. This versatility, and the equally important abilities to orchestrate, command, control, and support dispersed joint forces permit the decisive application of our strengths against enemy weaknesses. Strategic agility is essential if we are to remain globally engaged but not find ourselves improperly positioned or otherwise unable to respond to crises.

Overseas Presence. Overseas presence is the visible posture of US forces and infrastructure strategically positioned forward, in or near key regions. Permanently stationed and rotationally or temporarily deployed forces promote security and stability, prevent conflict, give substance to our security commitments, and ensure our continued access. Overseas presence enhances coalition operations by promoting joint and combined training and encouraging responsibility sharing on the part of friends and allies. Overseas presence contributes to deterrence by demonstrating our determination to defend US, allied, and friendly

Our forces must be able to seize and maintain the momentum of operations rapidly to meet multiple demands in an uncertain and complex strategic environment.

interests in critical regions while enabling the US to rapidly concentrate military power in the event of crisis. The presence of our forces provides commanders with a flexible array of options to respond promptly to aggression. Overseas presence forces embody global military engagement. They serve as role models for militaries in emerging democracies; contribute uniquely to the stability, continuity, and flexibility that protects US interests; and are crucial to continued democratic and economic development.

Power Projection. Power projection is the ability to rapidly and effectively deploy and sustain US forces in and from multiple, dispersed locations. Complementing overseas presence, power projection strives for unconstrained global reach. Power projection assets are tailored to regional requirements and send a clear signal of US commitment. Being able to project power means being able to act even when we have no permanent presence or infrastructure in a region. If necessary, it means fighting our way into a denied theater or creating and protecting forward operating bases. The ability to assemble and move to, through, and between a variety of environments, often while reconfiguring to

meet specific mission requirements, is essential to offsetting an adversary's advantages in mass or geographic proximity. Global power projection provides our national leaders with the options they need to respond to potential crises.

Decisive Force. Decisive force is the commitment of sufficient military power to overwhelm all armed resistance in order to establish new military conditions and achieve political objectives. In cases not involving armed resistance, decisive force means that US forces will be wholly sufficient to accomplish the full scope of their military tasks. Decisive force in the early stages of a crisis can be critical to deterring aggression. The concept does not promise quick or bloodless solutions to military challenges, but does require that, where the actual commitment of military power is anticipated, such force will be clearly superior to that of any potential adversary.

Global power projection provides our national leaders with the options they need to respond to potential crises.

The Joint Force

To execute this strategy the United States requires forces of sufficient size, depth, flexibility, and combat power to defend the US homeland; maintain effective overseas presence; conduct a wide range of concurrent engagement activities and smaller-scale contingencies, including peace operations; and conduct decisive campaigns against adversaries in two distant, overlapping major theater wars, all in the face of WMD and other asymmetric threats. This section describes the “full spectrum” forces needed to meet these core requirements, including their three key characteristics; their general size and composition; their overseas posture and readiness; and the capabilities and strategic enablers essential to the execution of this strategy.

Characteristics of a Full Spectrum Force

US Armed Forces as a whole must be multi-mission capable; interoperable among all elements of US Services and selected foreign militaries; and able to coordinate operations with other agencies of government, and some civil institutions.

Multi-Mission Capable. Our forces must be proficient in their core warfighting competencies and

able to transition smoothly from a peacetime posture to swift execution of multiple missions across the full spectrum of operations. They require the correct mix of capabilities between and within the Services, and among conventional, nuclear, and special operations forces. In addition, our armed forces must strike an appropriate balance between

the exploitation of advanced technology and the recognition that most military missions remain manpower intensive. The wide range of likely military operations demands that our forces be able to quickly shift from one type of operation to another. They must also retain their ability to operate successfully despite an adversary's use of asymmetric

means. The leadership, discipline, organization, and training inherent in maintaining our core warfighting competencies are the foundation of our ability to adapt readily and efficiently to the challenges peculiar to a wide variety of smaller-scale contingencies.

Joint. Each Service, including the US Coast Guard when assigned, brings its own set of capabilities and strengths to a mission. Some situations demand the unique capabilities of only one Service, but most will call for capabilities from all Services. The skillful and selective combination of Service capabilities into Joint Task Forces provides US com-

manders great flexibility in tailoring forces to meet national objectives given specific circumstances. As important, it presents an enemy with an overwhelming array of capabilities against which to defend. A fully joint force requires joint operational concepts, doctrine, tactics, techniques, and procedures — as well as institutional, organizational, intellectual, and system interoperability — so that all US forces and systems operate coherently at the strategic, operational, or tactical levels. Joint effectiveness does not mean that individual pieces of equipment or systems are identical, but rather that commanders are not constrained by technical or doctrinal barriers among the components of the joint force, and that the joint force's capability is dramatically enhanced by the blending of complementary Service capabilities.

Interoperable. All elements of US joint forces must be able to work together smoothly. Success on the battlefield will depend on the operational and tactical synergy of integrated, agile Service forces. Although we must retain the capability to act unilaterally, we prefer to act in concert with our friends and allies. Laying a solid foundation for interoperability with our alliance and potential coalition partners is fundamental to effective combined operations. We remain committed to

doctrinal and technological development with our key allies and to combined training events and exercises that contribute to interoperability.

It is imperative that our Joint Forces also enhance their ability to operate in consonance with other US government agencies, and with Non-governmental Organizations (NGOs), International Organizations (IOs), and Private Voluntary Organizations (PVOs) in a variety of settings. The specialized access and knowledge these organizations possess can facilitate prompt, efficient action to prevent conflict, resolve a crisis, mitigate suffering, and restore civil government upon conflict termination. Achieving interagency and civil interoperability through the continuing development of our doctrine and interagency participation in our training exercises is important to the unity of effort upon which success in many missions depends.

Today's Force

The Total Force. The Total Force requires the unique contributions of its Active and Reserve Components and its civilian employees. All elements of the Total Force must be appropriately organized, modernized, trained, and integrated.

As described in the QDR report, the Total Force required to carry out the President's 1997 *National Security Strategy* and this supporting military strategy at prudent military risk includes:

Success on the battlefield will depend on the operational and tactical synergy of integrated, agile Service forces.

All elements of the Total Force must be appropriately organized, modernized, trained and integrated.

Army – Four active corps with ten active divisions (six heavy, two light infantry, one airborne, and one air assault); and two active armored cavalry regiments; fifteen National Guard enhanced separate brigades; the capability provided by appropriately restructured National Guard

combat divisions; and other appropriate forces.

Navy – Twelve aircraft carriers, eleven air wings, twelve amphibious ready groups, 116 surface combatant ships, 50 attack submarines, and augmentation forces of the Naval Reserve.

Air Force – A total fleet of 187 bombers, just over 12 active fighter wing equivalents, eight reserve component fighter wing equivalents, and four National Guard dedicated continental air defense squadrons (other forces will be used to handle the US air sovereignty mission) together with the currently programmed tanker and airlift fleets.

Marine Corps – Three active Marine Expeditionary Forces (MEF) each comprised of a command element, a division, an aircraft wing, and a service support group. The active force will continue to be augmented and reinforced by one Reserve division/wing/service support group.

Coast Guard – Approximately 50,000 active and reserve personnel and 43 medium- and high-endurance cutters.

Civilians – Approximately 640,000 men and women whose support is essential to the maintenance of our readiness. From depot workers to senior-level leaders, they work together to perform functions ranging from policy direction to maintenance of our total force.

Special Operations Command – A joint special operations force consisting of approximately 47,000 Army, Navy and Air Force active and reserve personnel.

Reserve Components. The Reserve Components, in addition to being essential participants in the full range of military operations, are an important link

between the Armed Forces and the public. Mobilization of the Reserve Components has always been an important indicator of the commitment of national will. Guardsmen and reservists are not only integrated into war plans, but also provide critical skills in carrying out contingency operations, as well as augmenting and supporting active units during peacetime. National Guard and other Reserve Component elements also provide the NCA with a

strategic hedge against uncertainty and with an organized basis to expand our Armed Forces if necessary. Additionally, they also provide a rotational base to ease the tempo of unit and individual deployments for the Active Component.

Posture. Most US forces are based in CONUS but are continuously available for deployment. We will

maintain roughly 100,000 military personnel in both the European and Pacific regions. Additionally, we will maintain an appropriate presence in the Arabian Gulf region to deter threats to our interests there. These forces signal our commitment to peace and stability in these regions. They affirm our leadership of important alliances and allow us to help

shape allied defense capabilities. They underscore our commitment to remain engaged as a stabilizing influence, reinforce our bilateral relations with key partners, alleviate the potential for destabilizing arms races, underwrite deterrence in key regions and strengthen our voice in international forums.

Readiness. The readiness of US military forces to meet the full range of missions has never been more important. Ready forces provide the flexibility needed to shape the global environment, deter potential foes and, if required, to rapidly respond to a broad spectrum of crises and threats, including

major theater wars. In addition, readiness instills in our people the confidence needed to succeed in a wide variety of challenging situations. Each Service has a different approach to readiness, due to unique force characteristics, contingency plans, response requirements, peacetime forward deployment levels, the availability of training infrastructure and perishable skills. The Services will maintain readiness sufficient to meet the most demanding deployment requirements while seeking sensible management practices that conserve resources and mitigate the potential negative effects of high operational and personnel tempos.

Capabilities. As noted throughout this NMS, the US military must have capabilities that give the national leadership a range of viable options for promoting and protecting US interests in peacetime, crisis, and war. The Joint Force must be able to defeat adversaries in two distant, overlapping major theater wars from a posture of global engagement and in the face of WMD and other asymmetric threats. It must respond across the full spectrum of crises, from major combat to humanitarian assistance operations. It must be ready to conduct and sustain multiple, concurrent smaller-scale contingency operations. In addition to these core require-

... readiness instills in our people the confidence needed to succeed in a wide variety of challenging situations.

. . . our forces must be able to conduct and sustain operations that accomplish US objectives, promote post-conflict stability, and prevent the recurrence of conflict.

ments, US Armed Forces provide the NCA with several equally important capabilities.

Strategic Deterrence.

Credible standing nuclear and conventional forces cause potential adversaries to consider the consequences of pursuing aggression. Although most nuclear powers continue to reduce their arsenals, our triad of strategic forces serves as a vital hedge against an uncertain future, a guarantor of our security commitments to our allies, and a deterrent to those who would contem-

plate developing or otherwise acquiring their own nuclear weapons. Strategic nuclear weapons remain the keystone of US deterrent strategy. A mix of forward deployable non-strategic nuclear and conventional weapons adds credibility to our commitments. Deterrence is further enhanced by the ability of US forces to attack targets even when access to regional bases may not be feasible or assured. Geography and political constraints on access will not restrict our ability to conduct long range, stand-off attacks against a full range of targets in hostile territory.

Decisive Operations. In situations such as an MTW, the Armed Forces must be able to gain the initiative quickly. Our forces must have the

capability to halt an enemy; immediately initiate operations that further reduce his capacity to fight; and mount decisive operations to ensure we defeat him and accomplish our objectives. But wresting military initiative from the enemy is not the end of our commitment. From the onset of a crisis or conflict until termination, our forces must be able to conduct and sustain operations that accomplish US objectives, promote post-conflict stability, and prevent the recurrence of conflict.

Special Operations. The range of challenges to our security demands an ability to influence certain events with forces that are smaller and less visible than conventional formations, offering the NCA options that do not entail a major military commitment. Special Operations Forces provide this capability and offer unique skills, tactics, and systems for the execution of unconventional, potentially high-payoff missions.

Forcible Entry. The United States must be able to introduce military forces into foreign territory in a non-permissive environment. While the United States will pursue the cooperation of other governments to allow US forces access, it must not

assume that such cooperation will always be forthcoming. A forced entry capability ensures that the US will always be able to gain access to seaports, airfields, and other critical facilities that might otherwise be denied. It reassures allies that our ability to come to their aid cannot be denied by an enemy. It also allows future joint force commanders to retain operational freedom of action and gives the United States the ability to go anywhere that US interests require.

Force Protection. Multiple layers of protection for US forces and facilities at all levels, beginning at home, enable US forces to maintain freedom of action from predeployment through employment and redeployment. Fluid battlefields and the potential ability of adversaries to orchestrate asymmetric threats against our forces require that we seek every means to protect our forces. Comprehensive force protection requires the employment of a full array of active and passive measures. The variety of challenges that we will face may also require less than lethal technology to meet demands at the lower end of the range of military operations. Force protection initiatives must thus address all aspects of potential threats,

to include terrorism, WMD, information operations, and theater ballistic and cruise missiles.

Countering Weapons of Mass Destruction (WMD).

The continued proliferation of WMD, particularly chemical and biological weapons (CBW), has made their employment by an adversary increasingly likely in both major theater war and smaller-scale contingencies. US forces must have a counterproliferation capability balanced among the requirements to prevent the spread of WMD through engagement activities; detect an adversary's possession and intention to use WMD; destroy WMD before they can be used; deter or counter WMD; protect the force from the effects of WMD through training, detection, equipment, and immunization; and restore areas affected by the employment of WMD through containment, neutralization, and decontamination. Since many operations will be conducted as part of an alliance or coalition,

we must encourage our friends and allies to train and equip their forces for effective operations in environments where WMD usage is likely.

Focused Logistics. Military operations in today's environment require the ability to tailor logistics packages to meet operational and tactical

Fluid battlefields and the potential ability of adversaries to orchestrate asymmetric threats against our forces require that we seek every means to protect our forces.

requirements in hours or days. US forces must have the ability to link information, logistics, and transportation technologies together to permit continuous operations by leaner and more agile forces in any environment, including those contaminated by the effects of NBC agents. Joint sustainment initiatives such as Joint Total Asset Visibility, the Global Transportation Network, and the Global Combat Support System are deployable, automated supply and maintenance information systems that provide in-transit visibility, eliminate redundant requisitions and reduce delays in the shipment of essential supplies. In-transit visibility, in particular, is key to realizing the benefits of focused logistics. Our efficient use of these systems produces a smaller logistics tail that reduces the burden on transportation systems, requires fewer resources to defend, is more difficult for an enemy to detect and target, and enhances our own mobility.

Information Operations. Success in any operation depends on our ability to quickly and accurately integrate critical information and deny the same to an adversary. We must attain information superiority through the conduct of both offensive and defensive information operations. Information

operations are, however, more than discrete offensive and defensive actions; they are also the collection and provision of that information to the warfighters. Superiority in these areas will enable commanders to contend with information threats to their forces, including attacks which may originate from outside their area of operations. It also limits an adversary's freedom of action by disabling his critical information systems. We are developing joint doctrine for offensive and defensive information operations

that assigns appropriate responsibilities to all agencies and commands for assuring committed forces gain and maintain information superiority. This emerging joint doctrine must fully integrate interagency participation allowing us to leverage all existing information systems.

Strategic Enablers. A number of assets -- strategic enablers -- are critical to the worldwide application of US military power and our military strategy.

People. Our nation is committed to an All-Volunteer Force. Its people are the most important enabler of our strategy. The quality of this force is critical. Only the most dedicated, well-trained personnel with first class leaders will succeed in the complex and fast-paced environment of future military oper-

Only the most dedicated, well-trained personnel with first class leaders will succeed in the complex and fast-paced environment of future military operations.

ations. While modern technology enables our forces to perform their missions more effectively, it cannot substitute for high quality people. To recruit and retain people who meet high military standards, the quality of life of our military personnel must be commensurate with the sacrifices we ask them to make. We must provide challenging career options, continual professional development, adequate compensation, medical care, housing, and a stable retirement system. To ensure the viability of the Reserve Components, we must work to safeguard their employment rights and provide

employers with incentives for continued support. We must manage the tempo of operations, deployments and personnel transfers to avoid adverse effects on our people and their families. Sustaining core warfighting competencies while adopting new technologies and operational concepts also requires continuous training and education. Finally, the defense of our country

and the lives and welfare of our people should be entrusted only to military leaders of honorable character who prove worthy of their profound responsibilities.

Robust All-Source Intelligence. A globally vigilant intelligence system that is able to operate in a complex environment with an increasing number of potential opponents and more sophisticated tech-

nology is critical. Our Armed Forces require the timely collection, evaluation, and assessment of a full range of geo-political, socio-economic, and military information throughout the full spectrum of conflict. Our intelligence system must be capable of maintaining its global warning capabilities even while focusing on one or more crises. It must overcome increasingly varied means of deception and protect and secure its information channels. It must respond to the warfighters' needs during compressed decision cycles, and accommodate "smart" and "brilliant" weapons systems that pass targeting information directly to weapons platforms. The technical ability to deliver large quantities of intelligence to all levels without overwhelming commanders and leaders has enormous promise. However, quality intelligence remains equally dependent upon subjective human judgment, from collection and processing to production and dissemination.

Global Command and Control. Robust intelligence and assured information systems are also critical to the command and control of our forces. Global communications must allow for the timely exchange of information, data, decisions, and orders. The ability to gather, process, and disseminate an unin-

...the quality of life of our military personnel must be commensurate with the sacrifices we ask them to make.

Robust strategic sealift, air mobility, and ground transportation combined with prepositioned supplies and equipment ashore and afloat, are critical . . .

terrupted flow of reliable and precise information under any conditions is a tremendous strategic and military advantage. A secure C4ISR (Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance) architecture must be designed and developed from the outset for rapid deployment and with joint and multinational interoperability in mind.

Space Control. As we will continue to do at sea and in the skies, we will also endeavor to maintain our current technological lead in space as more users develop their commercial and military capabilities. It is becoming increasingly important to guarantee access to and use of space as part of joint operations and to protect US interests. Space control capabilities will ensure freedom of action in space and, if directed, deny such freedom of action to adversaries.

Strategic Mobility. Robust strategic sealift, air mobility, and ground transportation combined with prepositioned supplies and equipment ashore and afloat, are critical to maintaining strategic agility. In addition our forces will normally require access to US and overseas support infrastructure to maintain our ability to project power in times of crises. Enroute infrastructure will assist our forces in rapidly establishing and positioning themselves to dominate any situation. Keeping pace with evolving technology in the transportation industry guarantees our mobility forces continued global reach. Strategic mobility enhancements like increased airlift capability, additional prepositioning of heavy equipment afloat and ashore, increased sealift surge capacity, and additional material handling equipment (MHE) will ensure strategic agility and facilitate our ability to protect our national interests and assist our allies when needed.

Air and Sea Control. The successful application of military power is dependent on uninhibited access to air and sea. Control of these mediums allows the United States to project power across great distances, conduct military operations, and protect our interests around the world. Our forces will seek to gain superiority in, and dominance of, these mediums to allow our forces freedom to conduct operations and to protect both military and commercial assets.

Conclusion

This National Military Strategy, building on the foundation of previous editions, supports the President's *A National Security Strategy for A New Century* and the QDR report. It carries forward the theme that US military power is, and will continue to be, fundamental to ensuring our national security.

The United States will remain the world's only global power for the near-term, but will operate in a strategic environment characterized by rising regional powers, asymmetric challenges including WMD, transnational dangers, and the likelihood of wild cards that cannot be specifically predicted. The dangers we could face can be mitigated by military activities that **Shape** the strategic environment and **Respond** to the full spectrum of crises, while **Preparing** our Armed Forces now for an uncertain future. The force structure described in this document and our overseas presence, combined with our ability to rapidly project combat power anywhere in the world, provides the

strategic agility we will require to meet the challenges we are likely to face.

As we pursue the President's strategy for enhancing our security in this new era, the demand for military capabilities and skills is unlikely to diminish, both to deter and defeat aggression in two distant and overlapping MTWs, and in roles other than traditional warfighting. Our Armed Forces' core competence -- the ability to apply decisive military power to deter or defeat acts of aggression -- must remain the primary consideration in determining the structure, training and employment of our military forces.

We cannot know with certainty who our foes will be or where our forces will be needed in the future. In a time of both uncertainty and promise, this National Military Strategy and our Armed Forces provide our Nation with the means to protect our interests and promote

a peace that benefits America and all like-minded nations.
